Chandler (HB 312) **Act No. 268**

Existing law prohibits the placement of fishing gear within 500 feet of the mouth of an inlet or pass or within 500 feet of a water control structure, dam, or weir. Provides an exception for hoop nets in those portions of Little River located in LaSalle and Grant parishes; however, the exception is subject to some misinterpretation.

New law makes the exception contained in existing law clearer and more precise and eliminates the authorization to use leads and wings within 500 feet of an inlet or structure.

Effective August 15, 2011.
