Fiscal Note On: **HB 714** HLS 06RS 276
 Bill Text Version: **ORIGINAL**
 Opp. Chamb. Action:
 Sub. Bill For.:
 Proposed Amd.: **w/ PROP HSE COMM AMD**

Date: April 26, 2006 3:37 PM	Author: GALLOT
Dept./Agy.: Revenue / Treasury	Analyst: Greg Albrecht
Subject: Increase Severance Tax Allocation	

TAX/SEVERANCE TAX OR -\$7,400,000 GF RV See Note Page 1 of 1
 (Constitutional Amendment) Increases the general severance tax allocation to parishes

Current law allocates 20% of severance taxes on natural resources other than sulphur, lignite, or timber (primarily oil & natural gas) to the parishes in which production occurs, up to a maximum of \$750,000 per year.

Proposed law increases the maximum allocation to \$1 million, effective July 1, 2007. This maximum is to be increased every five years, beginning July 1, 2012, based on the aggregate increase in the Consumer Price Index over the prior five-year period.

To be submitted at the statewide election on November 7, 2006.

EXPENDITURE EXPLANATION

There is no anticipated direct material effect on governmental expenditures as a result of this measure.

REVENUE EXPLANATION

The estimated additional dedication away from the state general fund and to the parish severance tax allocation displayed in the table above is the result of a simulation of the allocation made during FY05 under the current maximum of \$750,000 per parish and the proposed maximum of \$1 million per parish. Under the current maximum the parishes receive an allocation of \$28.6 million. Under the proposed maximum the parishes received an allocation of \$36 million, resulting in an aggregate increase in the allocation of \$7.4 million. This increased allocation would accrue to 31 of the 64 parishes. The other parishes do not have sufficient production to receive additional monies under a greater maximum allocation.

Every five years, beginning July 1, 2012, the maximum allocation would be increased on the basis of the increase in the Consumer Price Index (CPI) for the most recent five-year period, and this would result in larger shares of severance tax collections being allocated to the parishes. For illustration purposes, a current forecast of the CPI over the 2007 - 2012 period indicates an expected 9.7% growth over that entire 5-year period. This would result in a new maximum allocation of \$1,097,000. Under this new maximum the FY05 allocation would be some \$38.8 million greater than under current law, or some \$2.7 million greater than under the initial increase in the maximum (\$1 million) proposed by the bill.

Actual changes in the allocation will depend on the key factors of production in each parish, the prices of oil & natural gas, and CPI-inflation over five-year periods. Production has been adversely affected by hurricanes Katrina and Rita, but should be back to as near normal as possible by the effective date of this bill (mid-year 2007). Oil & gas prices are the most volatile factors, but current price forecasts for 2007-2008 are similar to the actual prices experienced in FY05. Thus, the allocation in FY05 is likely a reasonable basis for the estimates associated with this bill in the near-term. In addition, changes in production and prices would affect both the underlying current law baseline and the simulated proposed law result equally. The difference between these two calculations at different maximum allocations is the fiscal effect of the bill and this difference is likely to be less affected by production and price volatility.

Senate Dual Referral Rules

13.5.1 >= \$500,000 Annual Fiscal Cost

13.5.2 >= \$500,000 Annual Tax or Fee Change

House

6.8(F) >= \$500,000 Annual Fiscal Cost

6.8(G) >= \$500,000 Tax or Fee Increase or a Net Fee Decrease
