HB 119 Original

2019 Regular Session

Bishop

**Abstract:** Requires an insurer to provide a prescriber with a list of alternative disease-specific formulary medications upon denial of a prescription based upon step therapy or fail first protocols or nonformulary status.

Present law requires, notwithstanding the provisions of present law to the contrary, any health coverage plan which includes prescription benefits as part of its policy or contract, which utilizes step therapy or fail first protocols, and which is issued for delivery, delivered, renewed, or otherwise contracted for in this state on or after Jan. 1, 2011, to comply with the provisions of present law.

Proposed law retains present law but makes technical changes including the removal of a reference to a repealed statute.

Proposed law further requires, if a prescribed drug is denied by a health coverage plan based upon step therapy or fail first protocols, the health coverage plan to provide the prescriber with a list of the alternative disease-specific formulary medications in writing and attached to the letter of denial of prescription drug coverage.

Present law sets forth required actions by the issuer of a health benefit plan that covers prescription drugs and uses one or more drug formularies to specify the prescription drugs covered under the plan.

Proposed law retains present law and adds the requirement that, if a prescribed drug is denied based upon the drug's nonformulary status, the issuer shall provide the prescriber with a list of the alternative disease-specific formulary medications in writing and attached to the letter of denial of prescription drug coverage.

Simple notification of the availability and location of the formulary shall not be deemed sufficient to meet the requirements of proposed law.

(Amends R.S. 22:1053(A) and (D) and 1060.2(intro. para.); Adds R.S. 22:1053(E) and 1060.2(4))
