13 develop a sound and lasting solution to the deterioration of the quality of the Lake  
14 Providence watershed and that action based on the recommendations developed in this study  
15 be implemented as expeditiously as possible in order to preserve, protect, and enhance these  
16 resources now and for generations to come; and

21 Providence watershed; and

23 together with all the various stakeholders interested in the restoration of Lake Providence  
24 to identify the problems, determine solutions, and implement remedies to restore, preserve,
