EXPENDITURE EXPLANATION
 Local expenditures could increase by an indeterminable amount in the event that additional inspections made to all fire safety and prevention equipment at each school under its jurisdiction has to be made by a third party. The legislation does not require any reporting requirements, therefore, most additional inspections may be able to be conducted by school personnel at no additional cost. According to the State Fire Marshall, while their inspectors and other fire prevention bureaus are making their routine annual inspections, the inspectors may train school personnel to provide their own inspections of such equipment. In certain cases involving equipment such as sprinkler systems or vent hood suppression systems, the inspection may need to be made by the company who installed the equipment to ensure that it is in good working order. In these cases there may be additional costs to call a third party out to the schools, but such costs statewide cannot be estimated.

REVENUE EXPLANATION
 There is no anticipated direct material effect on governmental revenues as a result of this measure.
