

New law requires the commissioner of administration to establish and implement an agency position attrition analysis process to be used by each executive branch agency to review historical position vacancies, relative to authorized positions for each budget unit, program, and subprogram with a goal to reduce by 5% annually for three years by an equally proportionate reduction of such positions across all salary ranges of equal increments, beginning FY 2010-11. Establishes FY 2007-08 as the base year for comparative purposes.

New law provides that beginning in FY 2010-11 and each year thereafter, each agency shall compare the number of authorized positions for each budget unit, program, and subprogram to the number of authorized positions for those budget units, programs, and subprograms in the base year. Requires the agency to note all changes across budget units, programs, and subprograms, as well as any changes that occur relative to the distribution of positions within salary ranges.

New law requires the process to analyze the following:

- (1) General staffing needs of each agency.
- (2) The state general fund cost associated with the filling of each vacant position.
- (3) Any other information necessary to properly evaluate whether to retain or eliminate each vacant position.
- (4) Any workload measures which affect changes in the number of positions over time.
- (5) Any changes in law which affect staffing needs of an agency.

New law requires each executive branch agency to report the results of its analysis to the commissioner of administration no later than January 15 of each year. Requires the commissioner of administration to provide a written report to the Commission on Streamlining Government on the first day of the month following the month in which the executive budget is submitted to the Joint Legislative Committee on the Budget.

New law defines the following terms:

- (1) "Executive branch department" means:
 - (a) Each of the 20 executive branch departments authorized by the constitution and each executive branch agency allocated thereto, which is not subject to the provisions of R.S. 42:375.2.
 - (b) Each executive branch agency not allocated to an executive branch department or subject to the provisions of R.S. 42:375.2.
- (2) "Executive branch agency" means and includes all departments, agencies, boards, commissions, and other instrumentalities contained in the General Appropriation Act or the Ancillary Appropriations Act, but does not mean or include political subdivisions, as defined by Article VI, Section 44(2) of the Louisiana Constitution or any executive branch agencies which are subject to the provisions of R.S. 42:375.2.
- (3) "Vacant position" means any authorized position of employment for which a budget has been approved and an appropriation has been made or a transfer of funds effected pursuant to law, which is funded in whole or in part from the state general fund, but which is not filled.

Provides that nothing in new law shall limit the constitutional or statutory authority of the postsecondary education management boards to manage the institutions under their authority.

New law requires the Board of Regents (BOR) to establish and implement an agency position attrition analysis process to be used by each higher education system to review the historical employee vacancies relative to authorized table of organization full and part-time positions, funded in whole or in part by the state general fund, within each agency.

Establishes a goal to reduce by 5% annually for three years, by an equally proportionate reduction of such positions across all salary ranges of equal increments, the number of such positions in each higher education system, beginning with FY 2010-2011.

Requires the Board of Regents' process to analyze the following:

- (1) General staffing needs of each higher education system.
- (2) The state general fund cost associated with the filling of each vacant position.
- (3) Any other information necessary to properly evaluate whether to retain or eliminate each vacant position.

New law requires the BOR to provide a written report to the Commission on Streamlining Government indicating the state general fund dollar savings achieved as a result of the implementation of the agency position attrition analysis process and the number of vacant positions eliminated and any other information relating to personnel numbers, costs, and historical vacancies. Provides that such report be submitted on the first day of the month following the month in which the executive budget is submitted to the Joint Legislative Committee on the Budget.

New law defines the following terms:

- (1) "Agency" means and includes all agencies, boards, commissions, and other instrumentalities within a higher education system.
- (2) "Higher education system" means and includes each system and all institutions, agencies, and offices thereof for which the BOR maintains budgetary responsibility as provided in the state constitution.
- (3) "Vacant position" means any authorized table of organization full or part-time position of employment for which a budget has been approved and an appropriation has been made or a transfer of funds effected pursuant to law which is funded in whole or in part by the state general fund, but which is not filled.

Effective August 15, 2010.

(Adds R.S. 39:84.1 and R.S. 42:375.1)
