DIGEST

Morrell (SB 447)

Present law provides for the regulation of contractors by the La. State Licensing Board for Contractors (board).

Proposed law provides that no licensed contractor shall install solar electric systems or solar thermal systems on or after March 1, 2015, unless he is in compliance with the rules adopted by the board in accordance with the provisions of proposed law.

Proposed law provides that notwithstanding any provision of law to the contrary, no later than January 1, 2015, the board shall adopt rules in accordance with the Administrative Procedure Act regulating the installation of solar electric systems or solar thermal systems by licensed contractors. Such rules shall, at a minimum, include the requirement of passage by a contractor of a separate written examination that substantially conforms to the North American Board of Certified Energy Practitioners certification standards.

Proposed law provides that in developing the rules, the board shall specifically consider the feasibility of establishing a specialty classification for contractors who install solar electric systems or solar thermal systems. If the board determines that such specialty classification is warranted, it shall include requirements and procedures as necessary in the rules.

Proposed law provides for the definition of "solar electric system" and "solar thermal system".

Effective August 1, 2014.
