EXPENDITURE EXPLANATION

There is no anticipated direct material effect on governmental expenditures as a result of this measure. The Department of Revenue will incur minor reprogramming costs to incorporate the change in this credit.

REVENUE EXPLANATION

The existing state earned income tax credit has averaged \$47 million in the last three complete years (FY12 - FY14). Since this bill doubles the credit, it is reasonable to expect an additional \$47 million of foregone state tax revenue as a result of this bill. While fiscal years tend to have more than one tax period of returns filed in them, for personal income tax returns involving nonbusiness income items such as this credit, the bulk of the effect of a change such as proposed by this bill is likely to be exhibited in the fiscal year in which the first affected tax period ends. This bill makes this higher credit applicable for 2015, and will reduce FY16 revenues.
