HB 384 Original

2022 Regular Session

Wheat

Abstract: Requires pediatric day health care facilities licensed by the La. Dept. of Health to install and operate cameras at their premises and provides requirements and limitations relative to audio and video recordings made by such cameras.

Present law defines "pediatric day health care facility", in pertinent part, as a facility that provides care for medically fragile children under the age of 21, including technology-dependent children who require close supervision. Requires that pediatric day health care facilities be licensed by the La. Dept. of Health (LDH). Proposed law retains present law.

Proposed law requires each pediatric day health care facility to provide for the installation and operation at its licensed premises of cameras that record both video and audio. Stipulates that compliance with proposed law shall be a condition of a pediatric day health care facility's licensure.

Proposed law requires that the director of each pediatric day health care facility develop and share with all facility employees and parents of children served at the facility a policy relative to cameras at the facility that, at minimum, provides for all of the following:

- (1) The location and placement of cameras in any room, with one exception, in which children may be cared for.
- (2) A prohibition against the recording of the interior of a restroom or any other area in which a child's clothing may be changed or removed.
- (3) A requirement that written notice of the cameras be provided to facility employees, parents of children served at the facility, and authorized visitors.
- (4) A requirement that all employees who provide services at the facility receive training concerning the provisions of proposed law.
- (5) Provisions relative to the duration of retention of video and audio data recorded by the devices required by proposed law and procedures for data storage and disposal.
- (6) Procedures for protecting children's privacy and for determining to whom and under what circumstances video or audio data may be disclosed. Proposed law requires that the facility's policy restrict authorization to review video or audio data recorded by the devices required by proposed law to the following persons, exclusively:

- (a) The director of the pediatric day health care facility.
 - (b) The secretary of LDH or his designee.
 - (c) A parent of a recorded student upon the parent's request.
- (7) A requirement that any person who views a recording showing what he believes could be a violation of state or federal law shall report the suspected violation to the appropriate law enforcement agency.
- (8) A requirement that any camera installed pursuant to proposed law be in compliance with the National Fire Protection Association Life Safety Code.

Proposed law requires that recordings made by cameras at pediatric day health care facilities be kept confidential and provides that such recordings are exempt from the Public Records Law (present law, R.S. 44:1 et seq.).

(Amends R.S. 44:4.1(B)(26); Adds R.S. 40:2193.6)
