**EXPENDITURE EXPLANATION**

Proposed law may have an indeterminable but minimal impact on expenditures in the LA Department of Insurance (LDI). The proposed law creates the Insurance Regulatory Sandbox Act that allows the Commissioner of Insurance to grant 3-year innovation waivers to provide insurance products or services within the insurance market in the state without obtaining a license or other authorization through the regular regulatory process. The proposed law requires the department to develop rules and procedures for the application submission, granting, extending, denying, monitoring, and revocation of innovation waivers under this measure. Although LDI believes the number of applications for innovation waivers will be minimal, the Legislative Fiscal Office cannot determine the number of sandbox applications the department may receive or the number of approvals the commissioner may grant under this measure. LDI reports any workload associated with the newly proposed Sandbox Act, as well as IT cost to develop a new set of website pages, will be handled with existing staff and resources. To the extent a significant number of sandbox applications are received, LDI may require additional resources presumed to be SGR from application filing fees, as well as personnel to accommodate the increased workload.

**REVENUE EXPLANATION**

Proposed law has an indeterminable impact on SGR in the Department of Insurance. The proposed law authorizes the Commissioner of Insurance to impose a filing fee on applications for innovation waiver under the Insurance Regulatory Sandbox Act. Fees mitigate the expenses of the department. The Legislative Fiscal Office cannot determine the number of applications that would be submitted under this measure or anticipate the amount of revenue collected by the Department of Insurance from application filing fees from the effective date in FY 25 until sunset in FY 29 (6/30/29).
