INSURANCE POLICIES

OR INCREASE GF EX See Note

Provides for health insurance coverage of pregnancy-related and postpartum healthcare services. (8/1/24)

If a health plan provides maternity service benefits, <u>proposed law</u> requires the plan to include coverage for the following: (1) nutrition counseling services provided by a licensed dietitian/nutritionist in the first trimester of the pregnancy, regardless of whether there is a diagnosis of gestational diabetes or any other chronic health condition; and (2) postpartum services provided by a lactation consultant. <u>Proposed law</u> provides nutrition counseling may be subject to annual cost-sharing (deductibles, coinsurance, and copayments). <u>Proposed law</u> prohibits discriminatory language in any health coverage plan policy against licensed dietitians, nutritionists, lactation consultants, or their services. <u>Proposed law</u> provides for the definition of a health plan, including the Office of Group Benefits. <u>Proposed law</u> is effective January 1, 2026 (new health coverage plans) and January 1, 2025 (existing health coverage plans).

## **EXPENDITURE EXPLANATION**

Proposed law is anticipated to increase SGF expenditures in the health care exchanges by \$96,000 to \$144,000 beginning in FY 25 and subsequent fiscal years according to an analysis provided by the LA Department of Insurance (LDI) actuary. Under the Affordable Care Act (ACA), any state benefit mandate, through legislative or regulatory action, that exceeds what is considered an essential health benefit (EHB) would subject the state to defrayal costs. The proposed law would be considered a state benefit mandate; therefore, the state may be required to make payments to defray the cost of additional required benefits specified under this proposed law. Furthermore, proposed law will increase claims expenditures for the health insurance industry by an estimated \$324,000 - \$486,000 and increase premiums by \$381,000 - \$572,000 for private insurers and the insured in FY 25 (see Expenditure Explanation on page 2). The Office of Group Benefits (OGB) reports no impact.

## Office of Group Benefits Impact (Self-Generated Revenue Impact)

OGB reports that through its contracted third-party administrator, Blue Cross and Blue Shield of Louisiana (BCBSLA), all of its five selffunded health plans already comply with the provisions of this measure. All of OGB's health plans provide preventative or wellness care required by the Patient Protection and Affordable Care Act (ACA). This includes services recommended by the U.S. Preventive Services Task Force with an "A" or "B" grade, which is covered at 100% of allowable charges from in-network providers. Therefore, OGB does not anticipate any increased medical claims as a result of this measure.

## Insurance Exchanges Impact (State General Fund Defrayal Impact)

Proposed law may increase SGF expenditures beginning in FY 25 and subsequent fiscal years according to an analysis provided by the LDI health actuary. The state would be required to refund health claims expenditures for policies issued by qualified health plans through the health insurance exchange beginning in FY 25 with estimated costs totaling approximately \$96,000 to \$144,000 SGF and a potential phase-up of \$120,000 to \$180,000 SGF by FY 29. Claims expenses associated with the proposed law would be paid out of the state treasury. LDI bases this analysis on the following assumptions: the calculations are on a fiscal year basis; the exchange population is approximately 200,000 and the insured population is assumed to be stationary, entries equal exits; medical cost inflation (MI) is 8% in FY 26, then 5% in subsequent years; the premium loss ratio is 85%; and the estimated cost is between \$0.04 PMPM (low) and \$0.06 (high) PMPM over the entire insured population based on research and analysis, which represents a 0.01% annual premium increase of an average monthly premium/PMPM of \$650.

#### **CONTINUED EXPLANATION from page one:**

## EXPENDITURE EXPLANATION continued from page 1

Based upon the aforementioned assumptions on page 1, the estimated annual cost increases for insurance providers associated with claims are as follows:

Aggregate Cost Determination\* Aggregate cost = exchange population x PMPM cost x 12 months FY 25 (Low) - 200,000 x \$0.04 x 12 months = \$ 96,000 FY 25 (High) - 200,000 x \$0.06 x 12 months = \$144,000 FY 26 (Low) - \$ 96,000 x 8% MI = \$103,680 FY 26 (High) - \$144,000 x 8% MI = \$155,520 FY 27 (Low) - \$103,680 x 5% MI = \$108,860 FY 27 (High) - \$155,520 x 5% MI = \$163,300 FY 28 (Low) - \$108,860 x 5% MI = \$114,300 FY 28 (Low) - \$108,860 x 5% MI = \$171,470 FY 29 (Low) - \$114,300 x 5% MI = \$120,020 FY 29 (High) - \$171,470 x 5% MI = \$180,040

\*Estimated claims expenditures and premium increases are rounded.

#### PRIVATE INSURANCE IMPACT

Pursuant to R.S. 24:603.1, the information below is the projected impact of the proposed law on the private insurance market. Based upon an actuarial analysis prepared by LDI, the proposed law is anticipated to increase expenditures associated with claims by \$324,000 - \$486,000 and premium increases by \$381,000 - \$572,000 for private insurers and the insured in FY 25 with phase-up costs of an estimated \$405,000 - \$608,000 claims and \$477,000 - \$715,000 premiums by FY 29. LDI bases this analysis on the following assumptions: the calculations are on a fiscal year basis; the exchange population is approximately 675,000 (including 200,000 population in health exchanges) and the insured population is assumed to be stationary, entries equal exits; medical cost inflation (MI) is 8% in FY 26, then 5% in subsequent years; the premium loss ratio is 85%; and the **estimated cost is between \$0.04 PMPM and \$0.06 PMPM over the entire insured population, which represents a 0.01% annual premium increase of a average monthly premium/PMPM of \$650.** Based upon the aforementioned assumptions, the estimated annual cost increases for insurance providers associated with claims are as follows:

Aggregate Cost Determination*	Aggregate Extra Premium Determination*
(insured population x PMPM cost x 12 months x MI)	(PMPM cost x 12 months)/medical loss ratio x MI
FY 25 (Low) - 675,000 x \$0.04 x 12 months = \$324,000	FY 25 (Low) - (\$0.04 x 12 months)/85% = \$0.56
FY 25 (High) - 675,000 x \$0.06 x 12 months = \$486,000	FY 25 (High) - (\$0.06 x 12 months)/85% = \$0.85
FY 26 (Low) - \$324,000 x 8% MI = \$349,920	FY 26 (Low) - \$0.56 x 8% MI = \$0.61
FY 26 (High) - \$486,000 x 8% MI = \$524,880	FY 26 (High) - \$0.85 x 8% MI = \$0.91
FY 27 (Low) - \$349,920 x 5% MI = \$367,420	FY 27 (Low) - \$0.61 x 5% MI = \$0.64
FY 27 (High) - \$524,880 x 5% MI = \$551,120	FY 27 (High) - \$0.91 x 5% MI = \$0.96
FY 28 (Low) - \$367,420 x 5% MI = \$385,790	FY 28 (Low) - \$0.64 x 5% MI = \$0.67
FY 28 (High) - \$551,120 x 5% MI = \$578,680	FY 28 (High) - \$0.96 x 5% MI = \$1.01
FY 29 (Low) - \$385,790 x 5% MI = \$405,080	FY 29 (Low) - \$0.67 x 5% MI = \$0.70
FY 29 (High) - \$578,680 x 5% MI = \$607,614	FY 29 (High) - \$1.01 x 5% MI = \$1.06

\*Estimated claims expenditures and premium increases are rounded.
