

SENATE RESOLUTION NO. 204

BY SENATOR HODGES

A RESOLUTION

To create and provide for the Task Force on Protecting Louisiana's Critical Infrastructure from Foreign Adversaries to study real-world threats that foreign adversaries pose to Louisiana's critical infrastructure, including threats to our United States' military bases, oil and gas production and refining facilities, industrial manufacturing plants, energy generation infrastructure, and agriculture and food production lands.

WHEREAS, in a recent interview by Federal Bureau of Investigation Director Kash Patel stated that over the last several years that an alarming number of parcels of land and buildings that are surrounding United States' military bases have been bought by foreign adversaries, including Russian citizens and members of the Chinese Communist Party; and

WHEREAS, on June 3, 2025, Director Kash Patel also announced that a Chinese national, who allegedly expressed loyalty to the Chinese Communist Party and was funded by the Chinese government, reportedly smuggled a dangerous biological pathogen into the United States as an act of agroterrorism; and

WHEREAS, the biological pathogen that Director Patel referred to is a fungus that causes a disease known as "head blight" which infects wheat, barley, corn, and rice and can cause significant health issues in both humans and livestock and is responsible for billions of dollars in economic losses worldwide each year; and

WHEREAS, Director Patel also stated that, while the federal government has a role to play in protecting our nation from the threats imposed by the Chinese Communist Party efforts to infiltrate American institutions, critical infrastructure, and our food supply, each state must also take proactive measures to address these concerns in order to protect state infrastructures from the Chinese Communist Party's actions; and

WHEREAS, People's Republic of China (PRC) is a one-party rule nation that is

controlled by the Chinese Communist Party; and

WHEREAS, on April 18, 2024, former Federal Bureau of Investigation Director Christopher Wray stated that the PRC "has made it clear that it considers every sector that makes our society run as fair game in its bid to dominate on the world stage, and that its plan is to land low blows against a civilian infrastructure to try to induce panic and break America's will to resist"; and

WHEREAS, in the same speech, Former Director Wray stated that "the PRC's targeting of our critical infrastructure is both broad and unrelenting" and that the PRC is working to "give itself the ability to physically wreak havoc on our critical infrastructure at a time of its choosing"; and

WHEREAS, the purpose of compromising this infrastructure is "to cause real-world harm to American citizens and communities in an event of conflict" between the United States and the PRC, according to Wray; and

WHEREAS, this real-world harm directly threatens Louisianians because Louisiana is home to a significant number of the United States' military bases, oil and gas production and refining facilities, industrial manufacturing plants, energy generation infrastructure, and agriculture and food production lands; and

WHEREAS, study and more work is needed to protect Louisiana's critical infrastructure from foreign threats, in particular threats from the Russian government and the Chinese Communists Party.
