

RÉSUMÉ DIGEST

ACT 31 (SB 51)

2025 Regular Session

Luneau

Existing law provides that nothing in the Public Records Law shall require the disclosure of commercially sensitive information in the custody or control of a public power authority.

Existing law defines a "public power authority" to be a political subdivision of the state created by the governing authority of a municipality pursuant to existing law, for the purpose of the construction, acquisition, improvement, operation, or management of a public power project or improvement.

New law retains existing law and adds that a "public power authority" also means a utility division for the city of Alexandria and that the governing authority of the city of Alexandria shall have access to commercially sensitive information in the custody and control of the utility division.

Effective August 1, 2025.

(Amends R.S. 44:3.3(B)(2))
