HB 134 Original

2026 Regular Session

Schlegel

**Abstract:** Provides relative to interactive computer services that contract with minors and the display of material harmful to minors.

Proposed law defines "account", "interactive computer service", "minor", and "material harmful to minors".

Proposed law prohibits an interactive computer service that enters into a contract with a minor from doing any of the following:

- (1) Delivering or displaying material harmful to minors that was created or developed, in whole or in part, by the interactive computer service.
- (2) Using an algorithmic system to select, recommend, prioritize, or amplify material harmful to minors for delivery or display to a minor account.

Proposed law subjects any interactive computer service that violates the provisions of proposed law to a civil fine of up to \$10,000 per violation set and enforced by the attorney general by filing a civil enforcement action in a court of competent jurisdiction.

Prior to filing an enforcement action, proposed law requires the attorney general to provide the interactive computer service with a written notice that identifies each alleged violation and an explanation for each.

Proposed law provides a mechanism for an interactive computer service to cure the violation. If the violations are not cured or another violation is committed after receipt of written notice, proposed law authorizes the attorney general to file a civil enforcement action against an interactive computer service.

Proposed law provides for reasonable attorney fees, court costs, and investigative costs.

Effective Jan. 1, 2027.
