**Abstract:** Limits liability for owners of private airports for permitted recreational use of the property.

Present law (R.S. 2:1(9)) defines an "airport" as any area of land or water, except a restricted landing area, designed for the landing and takeoff of aircraft, whether or not facilities are provided for the sheltering, servicing, or repairing of aircraft or for receiving or discharging passengers or cargo; all appurtenant areas used or suitable for airport buildings or other airport facilities; and all appurtenant rights of way including easements through or other interests in air space over land or water and other protection privileges, the acquisition or

control of which is necessary to insure safe approaches to the landing areas and efficient operation.

Proposed law retains present law.

Proposed law limits liability of an owner of a private airport with respect to persons who use the property for recreational purposes.
