SB 171 Original

DIGEST
2026 Regular Session

Pressly

Present law provides the Department of Public Works, state of Louisiana provides planning assistance to municipal, parish, regional and other planning agencies of the state and is authorized to apply for and accept grants of money from the U.S. government or any federal agencies and may contract with them as necessary to accept the grant and any requirements for matching the grants. Proposed law retains present law and changes the agency from the Department of Public Works, state of Louisiana to the Department of Transportation and Development (DOTD).

Proposed law provides the chief engineer of the office of engineering of the Department of Transportation and Development will be a member appointed to the Red River Compact Commission. Proposed law changes the member from the chief engineer of the office of engineering of the Department of Transportation and Development to the secretary of the Department of Conservation and Energy.

Present law provides parishes and municipalities authorized to comply with federal flood insurance may adopt, ordinances, rules, and regulations, including zoning and land use regulations, necessary to comply with the requirements of the National Flood Insurance Act of 1968 in coordination with the chief resilience officer of DOTD. Proposed law retains present law and removes the chief resilience officer designee.

Proposed law provides the chief resilience officer of DOTD will cooperate with the Federal Insurance Administrator of the Federal Emergency Management Agency in the planning and carrying out of state participation in the National Flood Insurance Program and will aid, advise, and cooperate with parishes and municipalities attempting to qualify for participation in the program. Proposed law retains present law and removes chief resilience office of DOTD as the designee.

Present law provides the Coordinated Use of Resources for Recreation, Economy, Navigation, and Transportation Authority also known as the "authority", is established as the single coordinating entity responsible for prioritizing, planning, and funding projects related to flood control, risk reduction, navigation, and water resource management in all areas of the state not included within the coastal area. Proposed law retains present law and changes terminology from "risk reduction" to "flood risk reduction", and changes from "water resource management" to "floodplain and watershed management".

Present law provides the authority will implement policy addressing issues related to water quantity, flood risk mitigation, navigation, economic development, and recreation. Proposed law changes terminology from "water quantity" to "watershed management" and adds "floodplain management"

to the responsibilities of the authority.

Present law provides the definition of "integrated" as the coordinated planning, funding, construction, and operation of flood control, navigation, recreation, water management, and economic development projects to ensure efficient use of resources, minimize conflicts, and promote sustainable development. Proposed law retains present law and adds "floodplain management" to the definition. Proposed law further changes from "water management" to "watershed management" in the definition.

Present law provides the board shall have 16 members. Proposed law changes the number of members from 16 members to 17 members. Proposed law further provides members of the authority shall be subject to Senate confirmation.

Present law provides the secretary of LED will be a member of the authority and serve as a nonvoting member until gubernatorial designation of an alternative. Proposed law provides the agency authority member will change from secretary of LED to the executive director of CPRA.

Present law provides for an authority member from a levee board district located within the upland parishes. Proposed law retains present law and changes from one member to two members from upland parishes.

Present law provides the board will not consist of more than two levee boards. Proposed law changes from two levee boards to three levee districts.

Proposed law provides for technical changes.

Present law provides the authority will oversee riverine flood management, inland navigation, and water resource infrastructure within the upland area. Proposed law retains present law and changes the responsibility from water resource infrastructure to flood control infrastructure.

Effective August 1, 2026.

(Amends R.S.38:5.1(A), 20(A) and (B), 84(A) and (B), 2351(A) and (B), 2352(1), 2353(B)(1)(intro para), 2353(B)(1)(d) and (h) and (2), 2354(A)(1), 2356(A)(intro para) and 2356(B)(2), and 2358)
