EXPENDITURE EXPLANATION

Proposed legislation is not anticipated to have a material direct impact on local school systems. Requiring student athlete physical examinations to include cardiovascular prescreening consistent with nationally recognized, evidence-based guidelines, along with referral requirements and distribution of educational materials, is not expected to increase costs, as such screenings are conducted by healthcare providers as part of existing physical examinations. To the extent local education agencies incur administrative responsibilities related to updating forms, disseminating materials, and ensuring compliance, any associated impact is expected to be minimal and absorbed within existing resources. Costs associated with additional screening components or follow-up testing are expected to be borne by patients, insurers, or other healthcare payors.

REVENUE EXPLANATION

There is no anticipated direct material effect on governmental revenues as a result of this measure.
