Provides for blood pressure testing in schools. (8/1/26)

Proposed legislation requires that student athlete physical examinations include a cardiovascular prescreening conducted by a qualified healthcare professional in accordance with nationally recognized, evidence-based guidelines, mandates referral for students with positive findings, and requires distribution of educational materials on sudden cardiac arrest to parents or guardians.

EXPENDITURE EXPLANATION

Proposed legislation is anticipated to result in a minimal increase in administrative workload for local school systems associated with updating forms, disseminating educational materials, and ensuring compliance with new cardiovascular prescreening and referral requirements for student athlete physical examinations. However, any associated impact is expected to be absorbed within existing resources. Requiring student athlete physical examinations to include cardiovascular prescreening consistent with nationally recognized, evidence-based guidelines, along with referral requirements and distribution of educational materials, is not expected to increase costs, as such screenings are conducted by healthcare providers as part of existing physical examinations. Costs associated with additional screening components or follow-up testing are expected to be borne by patients, insurers, or other healthcare payors.

REVENUE EXPLANATION

There is no anticipated direct material effect on governmental revenues as a result of this measure.
