

1           THEREFORE, BE IT RESOLVED that the House of Representatives of the  
2           Legislature of Louisiana does hereby urge and request the Louisiana Department of Health,  
3           hereinafter referred to as the department, to conduct, in collaboration with the Louisiana  
4           Center for Health Innovation at the University of Louisiana at Lafayette which has  
5           substantial research activity, a study on the prevention and reduction of amputations  
6           resulting from diabetes and related complications.

7           BE IT FURTHER RESOLVED that the Louisiana Center for Health Innovation at  
8           the University of Louisiana at Lafayette shall utilize existing resources and collaborate with  
9           the department in conducting the study.

10          BE IT FURTHER RESOLVED that the study shall include but not be limited to the  
11          following:

- 12           (1) The prevalence of diabetes-related amputations in Louisiana.
- 13           (2) The cost to the state for treatment and care associated with those amputations.
- 14           (3) Evidence-based best practices for the prevention of diabetes-related amputations,  
15          including early detection and screening programs.
- 16           (4) Strategies to expand access to limb-saving services, including multidisciplinary  
17          care teams, wound care, podiatry, and patient education.
- 18           (5) Opportunities for public-private partnerships to reduce the rate of amputations.
- 19           (6) Preventative services including but not limited to topical oxygen therapies,  
20          advanced therapies including skin substitutions, autologous 3D bio-printing, and in-home  
21          services.

22          BE IT FURTHER RESOLVED that the study shall also include:

- 23           (1) Examination of amputations related to diabetic foot ulcers and peripheral artery  
24          disease.
- 25           (2) Development of recommendations regarding:
  - 26           (a) Methods to increase public awareness of diabetes-related amputations.
  - 27           (b) Best practices for reducing the number of amputations performed.
  - 28           (c) Policy solutions to ensure access to treatments to prevent amputations, including  
29          insurance coverage for therapies designed to treat diabetic foot ulcers.
  - 30           (d) Access to evidence-supported medical tools, technologies, and services.

1 (e) Methods to improve and incentivize quality care to avoid amputations.

2 (f) Strategies to promote collaboration among healthcare providers and stakeholders.

3 BE IT FURTHER RESOLVED that the Louisiana Department of Health and the  
4 Louisiana Center for Health Innovation at the University of Louisiana at Lafayette shall  
5 establish or appoint a workgroup of subject-matter experts and stakeholders, which may  
6 include but is not limited to physicians, nurses, podiatrists, endocrinologists, vascular  
7 specialists, public health representatives, and individuals affected by diabetes, to assist in  
8 conducting the study.

9 BE IT FURTHER RESOLVED that the Louisiana Department of Health shall submit  
10 a report of the findings and recommendations of the study to the House Committee on  
11 Health and Welfare and the Senate Committee on Health and Welfare no later than  
12 December 1, 2026, and shall make the report publicly available.

13 BE IT FURTHER RESOLVED that a copy of this Resolution be transmitted to the  
14 secretary of the Louisiana Department of Health and the director of the Louisiana Center for  
15 Health Innovation at the University of Louisiana at Lafayette.
