

HOUSE SUMMARY OF SENATE AMENDMENTS**HCR 26****2026 Regular Session****Chenevert**

STUDENT/STANDARDS: Requests that the State Bd. of Elementary and Secondary Education incorporate the science of human growth and development into content standards and provide curriculum and instructional materials on its website and that the state Dept. of Education post surgeon general-approved materials and information on its website

Synopsis of Senate Amendments

1. Adds a request that the state Dept. of Education provide scientifically accurate and age-and-grade- appropriate materials and information on its website that have been approved by the surgeon general and may be used in curriculum and instruction related to the standards, including high definition ultrasound video or computer-generated animation that depicts prenatal growth and development.

Digest of Resolution as Finally Passed by Senate

Requests that the State Bd. of Elementary and Secondary Education:

- (1) Incorporate the science of human growth and development, including but not limited to prenatal development, into the state content standards for science or health education at an age- and grade-appropriate level.
- (2) Provide age- and grade-appropriate materials and information on its website that may be used in curriculum and instruction related to the standards, including but not limited to videos showing prenatal development.
- (3) Submit a written report to the House and Senate education committees by March 1, 2027, relative to any action taken with respect to the content standards and the clearinghouse as requested in this Resolution.

Requests that the state Dept. of Education provide scientifically accurate and age-and-grade-appropriate materials and information on its website that have been approved by the surgeon general and may be used in curriculum and instruction related to the standards, including high definition ultrasound video or computer-generated animation that depicts prenatal growth and development.
