

RÉSUMÉ DIGEST

HCR 26

2026 Regular Session

Chenevert

Requests that the State Bd. of Elementary and Secondary Education:

- (1) Incorporate the science of human growth and development, including but not limited to prenatal development, into the state content standards for science or health education at an age- and grade-appropriate level.
- (2) Provide age- and grade-appropriate materials and information on its website that may be used in curriculum and instruction related to the standards, including but not limited to videos showing prenatal development.
- (3) Submit a written report to the House and Senate education committees by March 1, 2027.

Requests that the state Dept. of Education provide scientifically accurate and age-and-grade-appropriate materials and information on its website that have been approved by the surgeon general and may be used in curriculum and instruction related to the standards, including high definition ultrasound video or computer-generated animation that depicts prenatal growth and development.
