Provides an additional means by which public elementary and secondary schools may be transferred to the state's Recovery School District (Item #8)

The proposed legislation expands the authority of the Recovery School District such that all schools operating under the jurisdiction and direction of a school district that is in academic crisis shall be transferred to the Recovery School District, subject to the Board of Elementary and Secondary Education’s approval. A district in academic crisis is defined as one in which for the 04-05 school year has more than 30 schools that are academically unacceptable or more than 50% of its students attend schools that are academically unacceptable pursuant to the School and District Accountability Program. Schools transferred from districts are exempt from current law requirements governing the return of schools that are no longer academically unacceptable to the local school system.

EXPENDITURE EXPLANATION

There is no anticipated direct material effect on governmental expenditures as a result of this measure. Currently, there is a director and assistant director housed in the Department of Education (DOE) for the administration of the current Recovery School District. The DOE notes that additional staff may be required to administer the expanded program. However, the funding required for the additional administration would be paid out of funding retained by the Recovery School District. Schools that are transferred into the Recovery School District retain all State, Local and Federal funding associated with the particular school to run the school and educate the students.

REVENUE EXPLANATION

There is no anticipated direct material effect on governmental revenues as a result of this measure.
