\* The proposed bill impacts regular members of the Louisiana State Employees' Retirement System (LASERS). LASERS is funded from all of the above sources. Due to the impacts of Hurricanes Katrina and Rita it is not possible to provide specific information relating to expected usage and costs at this time. An illustration of costs is provided below.

It is our understanding that provisions of this bill would only apply to regular members who were actively employed with an employer under the LASERS system on August 29, 2005. The proposed legislation:

- (1) **Retirement Eligibility:** Allows members age fifty (50) or older with at least ten (10) years of service credit to elect an immediate retirement between December 1, 2005 and January 31, 2006 with a benefit equal to 2.25% of average compensation for each year of credited service. The member cannot be currently eligible to retire under the plan's normal retirement ages.
- (2) **Conversion of accumulated sick and annual leave:** Cash-out of the first three hundred (300) hours of accumulated leave, normally paid by the employer, will be paid from the retirement plan.
- (3) **Terminated positions to remain unfilled:** The member's vacated position is to go unfilled unless approved otherwise by the division of administration, and then limited to 25% of all positions vacated under this legislation.
- (4) **Rehired retirees not eligible for subsequent membership and benefits are suspended while so employed.**
- (5) **Ten percent (10%) of savings from this legislation is to go to an additional payment to reduce the Initial Unfunded Liability (IUAL).**

Actuarial Cost Impact

Due to the impacts of Hurricanes Katrina and Rita it is not possible to provide specific information relating to expected usage and costs at this time. If we assume that sixty percent (60%) of the eligible members would retire under the provisions of this legislation, the additional liability expected from the provisions of this legislation is \$278 million. This includes \$244 million from the immediate retirement provision and \$34 million from the 300 hour accumulated sick and annual leave cash out provision. These amounts would be amortized as a change in actuarial liability due to legislation over a thirty (30) year period with level payments at an 8.25% actuarial return rate would give. The results would be offset by the 10% payment to the IUAL required from the savings under the legislations provisions.

Offsetting these costs are the assumed additional contributions required to be submitted to the trust under the proposed legislation. These amounted to \$2 million in the first short year period, ranging from \$3.7 million to \$2.8 million thereafter (provided from the fiscal office estimates).

Application of the above assumption would result in the following costs:

EXPENDITURES	2005-06	2006-07	2007-08	2008-09	2009-010	5 YEAR TOTAL
UAL	-	24,300,000	24,300,000	24,300,000	24,300,000	97,200,000
IUAL Add Contr	(2,000,000)	(3,700,000)	(3,600,000)	(3,300,000)	(2,800,000)	(15,400,000)
ANNUAL TOTAL	\$ (2,000,000)	\$ 20,600,000	\$ 20,700,000	\$ 21,000,000	\$ 21,500,000	\$ 81,800,000

Cost impacts for fiscal year 2006 are significantly lower due to the mid-year election period between December 1, 2005 and January 31, 2006.
