 Proposed Amd.:
 Sub. Bill For.:

Date: May 14, 2015 4:00 PM	Author: ROBIDEAUX
Dept./Agy.: Revenue	Analyst: Greg Albrecht
Subject: Apportionment Factor For Aircraft Manufacturers	

TAX/TAXATION EG SEE FISC NOTE GF RV See Note Page 1 of 1
 Provides relative to calculation of the Louisiana apportionment percent and taxable capital for manufacturers of certain aircraft

Current law does not appear to explicitly account for the sale of aircraft in the corporate income and franchise tax apportionment factor calculations.

Proposed law will make the sale of aircraft manufactured or assembled in the state be the place where the aircraft is primarily stored when not in use, for purposes of the sales factor in the apportionment formula of such firms, determining their Louisiana corporate income and franchise tax base.

Effective upon governor's signature.

EXPENDITURE EXPLANATION

The Department of Revenue (LDR) will incur costs for computer system modification and testing, tax form redesign, and tax payer inquiries. These costs are typically small for individual tax law changes such as this (several thousands of dollars) and are typically absorbed within existing resources until cumulative changes necessitate additional resources be provided.

REVENUE EXPLANATION

The Department of Revenue indicates that current law does not address the determination of the ultimate destination of aircraft manufactured or assembled in the state with regard to apportionment calculations for corporate income and franchise taxes. This bill establishes that the place at which the aircraft is ultimately received shall be the place where the aircraft is primarily stored when not in use. The effect on aggregate net state tax receipts is unknown since cases where primary storage in Louisiana would work to increase the state tax base, while cases where primary storage outside Louisiana would work to decrease the state tax base.
