DIGEST

SB 249 Original

2017 Regular Session

Chabert

<u>Proposed law</u> provides that eighty-five percent of the federal revenues that are received by the state generated from Outer Continental Shelf oil and gas activity for the previous fiscal year shall be disbursed annually to primary levee districts for the purpose of hurricane protection in accordance with particular formulas. Further requires the Coastal Protection and Restoration Authority Board to modify its annual plan to account for these disbursements.

Effective July 1, 2017.
