PUBLIC RECORDS RE NO IMPACT See Note Page 1 of 1
 Provides relative to public geographic data

Present law (R.S. 44:1 et seq. - Public Records Law) provides for access and retention of public records; establishes a framework for the ready availability of public records to requesting persons; and provides that it is the duty of the custodian of public records to provide copies to persons requesting access to public records.

Proposed law retains **present law** and additionally requires that any public record that consists of geographic information system data that is made available to the public by the Department of Transportation and Development on the internet to additionally be made available in a format for expressing geographic annotation and visualization in two-dimensional or three-dimensional representations using applications that are available to the public without charge, such as Keyhole Markup Language (KML). **Proposed law** is effective 7/1/20.

EXPENDITURE EXPLANATION

There is no anticipated direct material effect on governmental expenditures as a result of this measure.

DOTD currently performs the role of collecting data and producing a statewide geospatial database. The department has rules that form the basis of standards for the state's geospatial database. DOTD reports that it is in the process of implementing an Enterprise Geographic Information System (GIS) mapping system with the ability to publish services onto the internet. All of the GIS data produced in this system can be consumed freely via Representational State Transfer (REST) services. Since the data is published as a feature service, labeling of features (annotations) can be enabled by a consumer. DOTD reports that it does not currently publish KML files since those are specific to certain Google applications, but that the system has the capacity to do so during the publishing process and can be done without a material impact on expenditures.

REVENUE EXPLANATION

There is no anticipated direct material effect on governmental revenues as a result of this measure.
