The original instrument and the following digest, which constitutes no part of the legislative instrument, were prepared by Tyler S. McCloud.

DIGEST 2021 Regular Session

SB 97 Original

Lambert

<u>Present law</u> requires the secretary of the department to adopt and promulgate rules, regulations, and standards for the transportation, processing, resource recovery, and disposal of solid wastes consistent with the general solid waste management plan adopted by the Dept. of Environmental Quality.

<u>Proposed law</u> retains <u>present law</u> except provides that such rules and regulations regulating solid waste not include advanced recycling or facilities that store post-use polymers or recovered feedstocks or that convert post-use polymers and recovered feedstocks through advanced recycling.

<u>Proposed law</u> provides the definition of solid waste does not include post-use polymers or recovered feedstocks that are converted through advanced recycling or are held at, or for the purpose of conversion at, an advanced recycling facility prior to conversion.

<u>Present law</u> defines"resource management" as the process by which solid waste is collected, transported, stored, separated, processed, or disposed of in any other way, according to an orderly, purposeful, and planned program.

<u>Proposed law</u> retains <u>present law</u> and provides that the term "resource management" does not include the storage of post-use polymers or recovered feedstocks or the conversion of post-use polymers or recovered feedstocks through advanced recycling.

<u>Present law</u> defines "resource recovery" as the process by which materials, excluding those under control of the Nuclear Regulatory Commission, which still have useful physical or chemical properties after serving a specific purpose are reused or recycled for the same or other purposes, including uses as an energy source.

<u>Proposed law</u> retains <u>present law</u> and provides that "resource recovery" does not include the conversion of post-use polymers or recovered feedstocks through advanced recycling.

<u>Present law</u> defines a "resource recovery and management facility" as any solid waste disposal area or other facility, the purpose of which is resource recovery or the disposal, recycling, processing, or storage of solid waste, excluding any "processing, treatment, or disposal facility".

<u>Proposed law</u> retains <u>present law</u> and provides the term "resource recovery and management facility" does not include a facility that stores post-use polymers or recovered feedstocks or converts post-use polymers or recovered feedstocks through advanced recycling.

Present law defines a "solid waste disposal facility" as any land area or structure or combination of

land areas and structures, used for storing, salvaging, processing, reducing, incinerating, or disposing of solid wastes, excluding any "processing, treatment, or disposal facility" and any facility where solid waste management activities are limited to transferring solid waste from collection vehicles to other vehicles for transport without processing.

<u>Proposed law</u> retains <u>present law</u> and provides the term "solid waste disposal facility" does not include a facility that stores post-use polymers or recovered feedstocks or converts post-use polymers or recovered feedstocks through advanced recycling.

<u>Proposed law</u> provides definitions for advanced recycling, advanced recycling facility, gasification, post-use polymer, pyrolysis, recovered feedstock, depolymerization, and solvolysis.

Effective August 1, 2021.

(Amends R.S. 30:2153(2) - (5); adds R.S. 30:2153(1)(b)(v), (8) - (15), and 2154(B)(1)(b)(iii))
