

RÉSUMÉ DIGEST

ACT 460 (HB 908)

2024 Regular Session

Amedee

Existing law provides with respect to immunization of persons entering schools, kindergartens, colleges, proprietary or vocational schools, and day care centers for the first time. Requires each person entering such an institution to present satisfactory evidence of immunity to or immunization against vaccine-preventable diseases according to a schedule approved by the office of public health, Dept. of Health, or to present evidence of an immunization program in progress.

Existing law provides that the schedule shall include measles, mumps, rubella, diphtheria, tetanus, whooping cough, poliomyelitis, meningococcal disease, and hemophilus influenzae Type B invasive infections.

New law prohibits a teacher or school employee or administrator from distinguishing between students based on whether a student has or has not received a vaccine from the schedule provided for in existing law.

Effective August 1, 2024.

(Amends R.S. 17:170(E))
