Provides for carbon sequestration. (8/1/25)

Current law requires the Commissioner of Conservation to establish rules, regulations, and orders necessary for administering and enforcing carbon sequestration operations, including plugging abandoned wells, closing associated surface facilities, removing equipment and structures, and conducting general site cleanup. The commissioner is authorized to conduct investigations, inspections, and inquiries related to waste prevention, enforce compliance, and approve unit operations for geologic storage to promote efficient development and prevent waste through the consolidation of separately owned tracts. Current law authorizes the Commissioner of Conservation to issue certificates of public convenience and necessity to carbon dioxide transporters and certificates of completion of injection operations to operators that meet applicable requirements following a public hearing.

Proposed law retains current law and provides that the Secretary give substantial consideration to local government comments when determining appropriate courses of action in matter requiring public comment or hearings. Entities issued a certificate of public convenience and necessity prior to the effective date of proposed law remain valid and are not subject to future determinations by the Commissioner.

Effective upon signature of the governor.

EXPENDITURES	2025-26	2026-27	2027-28	2028-29	2029-30	5 -YEAR TOTAL
State Gen. Fd.	\$0	\$0	\$0	\$0	\$0	\$0
