

2011 REGULAR SESSION
ACTUARIAL NOTE HB 369

House Bill 369 HLS 11RS-698 Original Author: Representative Gary Smith Date: April 26, 2011 LLA Note HB 369.01 Organizations Affected: Teachers' Retirement System of Louisiana OR INCREASE APV	The Note was prepared by the Actuarial Services Department of the Office of the Legislative Auditor.  Paul T. Richmond, ASA, MAAA, EA Manager Actuarial Services
--	---

Bill Header: RETIREMENT/TEACHERS: Relative to Teachers' Retirement System of Louisiana (TRSL), allows certain reemployed retirees to receive retirement benefits upon reemployment.

Cost Summary:

Actuarial Cost/(Savings) to Retirement Systems and OGB	\$1.0 to \$2.0 Million Annual Cost after 5 Years
Total Five Year Fiscal Cost	
Expenditures	Increase
Revenues	Increase

Estimated Actuarial Impact:

The chart below shows the estimated increase/(decrease) in the actuarial value of benefits, if any, attributable to the proposed legislation. Note: it includes the present value cost of fiscal costs associated with benefit changes. It does **not** include present value costs associated with administration or other fiscal concerns.

Actuarial Cost (Savings) to:	Increase (Decrease) in The Actuarial Present Value
All Louisiana Public Retirement Systems	\$1.0 to \$2.0 Million Annual Cost after 5 years
Other Post Retirement Benefits	Increase
Total	\$1.0 to \$2.0 Million Annual Cost after 5 years

Changes in the unfunded accrued liability of the retirement system resulting from HB 369 cannot be separately identified. Any changes in liability in future years will be recognized in the aggregate with other actuarial gains or losses and will be amortized over a period of 30 years. Subject to this caveat, this bill complies with the Louisiana Constitution which requires unfunded liabilities created by an improvement in benefits to be amortized over a period not to exceed ten years.

Estimated Fiscal Impact:

The chart below shows the estimated fiscal impact of the proposed legislation. This represents the effect on cash flows for government entities including the retirement systems and the Office of Group Benefits.

EXPENDITURES	2011-12	2012-13	2013-14	2014-15	2015-16	5 Year Total

2011 REGULAR SESSION ACTUARIAL NOTE HB 369

Bill Information:

Current Law

Under current law, reemployed retirees of TRSL are separated into two categories – those who are defined as a Retired Teacher and those defined as an Other Retired Member. A Retired Teacher is defined as:

1. A retiree who returns to active service as a classroom teacher (K through 12) in a critical teacher shortage area. Critical shortage area is defined as any subject area where a shortage of certified teachers has been confirmed by the employer and its governing authorities.
2. A retiree who returns to active service as a full-time certified speech therapist, speech pathologist, or audiologist in a school district where a shortage of such positions exists.
3. A retiree who returns to active service on or before June 30, 2010.

An Other Retired Member is defined as any re-employed retiree other than a Retired Teacher. A reemployed retiree working in higher education is not considered to be a Retired Teacher unless he returned to active employment on or before June 30, 2010.

The following rules pertain to a Retired Teacher:

1. The benefits of any reemployed Retired Teacher who returns to active employment before 12 months have passed since his retirement date shall be suspended while he is reemployed. Such suspension will end upon the earlier of his termination of reemployment or the first anniversary of his retirement.
2. The benefits of any reemployed Retired Teacher reemployed 12 months or more following the date of his retirement will not be suspended.
3. Neither the reemployed Retired Teacher nor his employer shall make contributions to TRSL during any period in which his benefits are suspended.
4. Both the reemployed Retired Teacher and his employer shall make contributions to TRSL during any period in which his benefits are not suspended.
5. A reemployed Retired Teacher will not accrue any benefits during his reemployment.
6. Upon termination of his reemployment a reemployed Retired Teacher may apply for a refund of the contributions (without interest) he made to TRSL during his reemployment.
7. Employer contributions made to TRSL during the reemployment of a reemployed Retired Teacher are not refundable to the employer.

The following rules pertain to a reemployed Other Retired Member.

1. The benefits of any reemployed Other Retired Member who returns to active employment at any time shall be suspended while reemployed.
2. Neither the reemployed Other Retired Member nor his employer shall make contributions to TRSL during his reemployment.
3. A reemployed Other Retired Member will not accrue any benefits during his reemployment.

According to R.S. 11:162, part time employees of employers participating in TRSL are required to be members of the retirement system. According to 26 CFR 31:312(b)(7)-2, a part time employee is any employee who normally works 20 hours or less per week.

Proposed Law

The following changes will be made under proposed law:

- The definition of a Retired Teacher will be changed to include any member of TRSL who returns to active service on a part time basis.

Implications of the Proposed Changes

HB 369 will allow members of TRSL who return to active service to be reemployed without a suspension of benefits. As a result, the pool of teachers, as well as other personnel subject to membership in TRSL, available to serve as part time employees should increase. However, because of the limitation imposed by HB 369, the opportunity for a member of TRSL to retire earlier than he would have otherwise, because he anticipates significant employment after retirement, will be restricted.

2011 REGULAR SESSION ACTUARIAL NOTE HB 369

Cost Analysis:

Analysis of Actuarial Costs

Retirement Systems

Legislation that allows a member of TRSL to collect a pension and continue to work in a position requiring active membership in the retirement system will have an actuarial cost if such legislation induces such a member to retire earlier than he would have otherwise. By retiring early, TRSL will be required to pay a pension to such a member for a longer period of time and contributions made to the system on the member's behalf will be reduced. This will be offset to a minor extent because the member will forego additional benefit accruals that he would otherwise have earned.

There is a cost to HB 369. Under the proposed law, some members of TRSL will base their decision to retire in whole or in part on the fact that they can return to work and supplement their income through part time employment subject to TRSL membership. They can be partially working and fully retired. Without HB 369, some of these same members would have remained fully employed without collecting a pension benefit.

Prior to the enactment of HB 519 which became Act 921 of 2010, a member of TRSL was allowed to retire, return to work, and collect both a pension and a paycheck 12 months after his retirement date. Benefits payable to a reemployed retiree were suspended by TRSL only if the retiree was working during the 12 month period immediately following his date of retirement.

This rule, which became known as the "Two Check Rule", had been in place for about 10 years. Prior to the enactment of the Two Check Rule, there were only about 3,000 retirees in a re-employment status each year. In 2008-09 there were about 7,500 re-employed retirees. Clearly, retirement patterns changed as a result of the Two Check Rule. Many workers elected to retire, returned to work, and then after one year earned a full salary and at the same time collected a full pension.

Act 921 of the 2010 session eliminated the Two Check Rule and essentially made it difficult for a member of TRSL to collect a salary and a pension at the same time. Although the Two Check Rule was preserved under very limited circumstances, it was anticipated that Act 921 would result in members delaying retirement until they were truly ready to leave the school or classroom. The actuarial note for Act 921 estimated annual savings five years after the enactment to be about \$108 million. The estimate was based on the additional contributions that would be made to TRSL and the reduction in benefit payments that would be made from the retirement system due to workers postponing retirement.

HB 369 will eliminate some of the savings estimated for Act 921. If HB 369 is enacted, we assume some workers will elect to retire earlier than they would have otherwise. Without HB 369, a TRSL member may not be able to afford to retire. But with the ability to supplement his or her income from part time employment, retirement may appear to be affordable. The fundamental question is, "How many members of TRSL will be induced to retire earlier than they would have otherwise and what is the cost associated with that inducement?"

If HB 369 is enacted, the maximum that a Retired Teacher could work after retirement without having benefits reduced would be 20 hours a week. It is quite likely that some member of TRSL will either find themselves in circumstances, or will be able to appropriately manage their circumstances, to allow for earlier normal retirement in anticipation of substantial earnings from part time work after retirement.

It is therefore estimated that there will be an increase in the actuarial cost and that the cost increase on an annual basis will range from \$1,000,000 to \$2,000,000. In preparing this estimate, we have assumed the following:

1. Each local school district or employer will define "part time basis" in accordance with current law.
2. Forty to 80 retirees will be working each fiscal year because they were induced to retire by the post retirement employment opportunity provided by HB 369.
3. The average annual pension for such workers induced to retire early will be \$25,000 a year.

Other Post Retirement Benefits

The liability for post-retirement medical insurance protection provided to retirees by the Office of Group Benefits or other insurers remains the same regardless of the employment status of a retiree. The liability is based on the present value of estimated claims and estimated claims will not change just because the member's status has changed from employee to retiree. However, depending on OGB rules or rules of other insurers providing health insurance coverage to TRSL members, the allocation of premiums between the employee and the employer may change as an employee moves from an active status to a retired status. Therefore:

1. OGB revenues may increase or decrease as a result of HB 369.
2. Employer premium expenditures may increase or decrease as a result of HB 369.

2011 REGULAR SESSION
ACTUARIAL NOTE HB 369

Analysis of Fiscal Costs

HB 369 will have the following effect on fiscal costs over the next 5 years.

Expenditures:

- 1. Expenditures from Local Funds and General Revenues will increase to the extent that local funds and the MFP for K through 12 will need to be adjusted to accommodate greater retirement plan costs.
- 2. Expenditures from TRSL (Agy/Self Generated) are estimated to increase \$1,000,000 to \$2,000,000 a year to pay benefits to those who would have otherwise not retired.

Revenues:

- TRSL revenues (Agy/Self Generated) are expected to increase \$1,000,000 to \$2,000,000 a year as employer contribution rates are increased to accommodate the estimated increase in annual costs.

The net effect on all Louisiana government will be a \$1,000,000 to \$2,000,000 increase in annual costs. Such cost increases cannot be separately identified, but rather will be recognized in the aggregate with any other actuarial gains and losses subject to 30 year amortization. The cost can neither be precisely determined nor allocated to any particular year of the fiscal measurement period.

TRSL reports that a one-time implementation cost of \$10,656 will be incurred in 2011-12 to administer the provisions of HB 369.

Actuarial Credentials:

Paul T. Richmond is the Manager of Actuarial Services for the Louisiana Legislative Auditor. He is an Enrolled Actuary, a member of the American Academy of Actuaries, a member of the Society of Actuaries and has met the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

Dual Referral:

Senate	House
<input checked="" type="checkbox"/> 13.5.1 ≥ \$100,000 Annual Fiscal Cost	<input checked="" type="checkbox"/> 6.8(F)(1) ≥ \$500,000 Annual Fiscal Cost
<input type="checkbox"/> 13.5.2 ≥ \$500,000 Annual Tax or Fee Change	<input checked="" type="checkbox"/> 6.8(F)(2) ≥ \$100,000 Annual SGF Fiscal Cost
	<input type="checkbox"/> 6.8(G) ≥ \$500,000 Annual Tax or Fee Change

Although fiscal costs for any one of the three fiscal years following the 2011 legislative session cannot be measured and the amount is not specified, it is likely that such cost will exceed \$500,000 in one or more years during the measurement period. The potential increase in expenditures from state general funds is also likely to exceed \$100,000 in any year during the measurement period.
