Proposed Amd.:
Sub. Bill For.:

Date: June 2, 2011	10:41 AM	Author: HEITMEIER
Dept./Agy.: Revenue		
Subject: Credit For Higher Education Loan Interest		Analyst: Greg Albrecht

TAX/INCOME/PERSONAL EG -\$6,300,000 GF RV See Note Page 1 of 1
Grants a non-refundable income tax credit for 10% of the deduction from gross income taken by a taxpayer on his federal income tax return for interest paid on a loan for higher education expenses. (gov siq)

Provides a nonrefundable tax credit to resident taxpayers for 100% of the adjustment taken on the federal tax return for interest paid on a loan for graduate (above the baccalaureate level) higher education expenses.

Effective for all tax periods beginning on and after January 1, 2011.

Annual Total	(\$6,300,000)	(\$6,300,000)	(\$6,300,000)	(\$6,300,000)	(\$6,300,000)	(\$31,500,000)

EXPENDITURE EXPLANATION

The Department of Revenue will incur costs associated with modifying tax forms (hardcopy and online) to accommodate this new credit. Typically, adjustments such as this may require \$20,000 - \$30,000 of staff time and effort to design, set up, and test.

REVENUE EXPLANATION

The bill targets the interest expense adjustment taken on federal returns of higher education loans above the baccalaureate level. This is a federal means-tested adjustment/deduction from income allowed for all higher education loan interest expense. A state tax credit would be available for this adjustment amount taken for loans on post-baccalaureate loans.

A relatively small amount of higher education loans should be loans for post-baccalaureate degrees. The following exercise attempts to recognize this likelihood. Federal tax year 2008 data (latest available) indicated that 6.4% of U.S. returns claimed this adjustment for all higher education loans, with an average amount of \$846. Census data indicates that the share of the Louisiana adult population that has a bachelor’s degree or higher is about 75% of the level of the U.S. as a whole, and only about 9% of the adult U.S. population has a post-baccalaureate degree. Applying these shares to the total number of Louisiana resident tax returns generates an estimate of 7,500 returns that could claim this credit. Utilizing the average adjustment amount from federal return data generates an estimate of \$6.3 million per year of tax credit exposure to state revenue.
